

## 系统开发工具基础实验报告

题目: Shell 工具和脚本; 编辑器(Vim); 数据整理;

学生姓名 周洋迅 学号 24020007175

学部、学院(中心) 信息科学与工程学部

专业 计算机科学与技术

日期 2025年8月29日

github 链接 https://github.com/zysgusg/SysDevelopmentTools

中国海洋大学

目录 1

# 目录

1	练习内容	2
	1.1 Shell 命令	. 2
	1.2 Shell 工具和脚本	. 2
	1.3 vim	. 3
2	练习结果	3
	2.1 结果截图	. 3
3	心得体会	10

1 练习内容 2

### 1 练习内容

#### 1.1 Shell 命令

- 1. 使用 echo \$SHELL 命令可以查看您的 shell 是否满足要求。
- 2. 在/tmp下新建一个名为 missing 的文件夹。
- 3. 用 man 查看程序 touch 的使用手册。
- 4. 用 touch 在 missing 文件夹中新建一个叫 semester 的文件。
- 5. 将以下内容一行一行地写入 semester 文件:

```
#!/bin/sh
curl --head --silent https://missing.csail.mit.edu
```

- 6. 尝试执行这个文件。例如,将该脚本的路径(./semester)输入到您的 shell 中并回车。如果程序 无法执行,请使用 ls 命令来获取信息并理解其不能执行的原因。
- 7. 查看 chmod 的手册 (例如,使用 man chmod 命令)
- 8. 使用 chmod 命令改变权限, 使./semester 能够成功执行, 不要使用 sh semester 来执行该程序。您的 shell 是如何知晓这个文件需要使用 sh 来解析呢?
- 9. 使用 | 和 > ,将 semester 文件输出的最后更改日期信息,写入主目录下的 last-modified.txt 的文件中
- 10. 写一段命令来从/sys 中获取笔记本的电量信息,或者台式机 CPU 的温度。

#### 1.2 Shell 工具和脚本

- 11. 阅读 man ls, 然后使用 ls 命令进行如下操作:-所有文件(包括隐藏文件)-文件打印以人类可以理解的格式输出(例如,使用 454M 而不是 454279954)-文件以最近修改顺序排序-以彩色文本显示输出结果
- 12. 编写两个 bash 函数 marco 和 polo 执行下面的操作。每当你执行 marco 时,当前的工作目录应当以某种形式保存,当执行 polo 时,无论现在处在什么目录下,都应当 cd 回到当时执行 marco 的目录。为了方便 debug,你可以把代码写在单独的文件 marco.sh 中,并通过 source marco.sh 命令,(重新) 加载函数。
- 13. 假设您有一个命令,它很少出错。因此为了在出错时能够对其进行调试,需要花费大量的时间 重现错误并捕获输出。编写一段 bash 脚本,运行如下的脚本直到它出错,将它的标准输出和标 准错误流记录到文件,并在最后输出所有内容。加分项:报告脚本在失败前共运行了多少次。

```
#!/usr/bin/env bash

n=$(( RANDOM % 100 ))

if [[ n -eq 42 ]]; then
echo "Something went wrong"
>&2 echo "The error was using magic numbers"
```

```
exit 1

fi

cho "Everything went according to plan"

Everything went according to plan"
```

- 14. 您的任务是编写一个命令,它可以递归地查找文件夹中所有的 HTML 文件,并将它们压缩成 zip 文件。注意,即使文件名中包含空格,您的命令也应该能够正确执行
- 15. 编写一个命令或脚本递归的查找文件夹中最近修改的文件。更通用的做法,你可以按照最近的 修改时间列出文件吗?

#### 1.3 vim

- 16. 完成 vimtutor
- 17. 下载我们提供的 vimrc, 然后把它保存到 /.vimrc。通读这个注释详细的文件 (用 Vim!), 然后 观察 Vim 在这个新的设置下看起来和使用起来有哪些细微的区别。
- 18. 安装和配置一个插件: ctrlp.vim
- 19. 自定义 CtrlP: 添加 configuration 到你的 /.vimrc 来用按 Ctrl-P 打开 CtrlP
- 20. 用 Vim 宏将 XML 转换到 JSON (例子文件)。尝试着先完全自己做,但是在你卡住的时候可以查看上面宏章节。

### 2 练习结果

#### 2.1 结果截图

```
zysgusg@aaa ~> echo $SHELL
/bin/bash
```

图 1: echo \$SHELL

```
zysgusg@aaa /tmp> ls
fish.zysgusg
snap-private-tmp
systemd-private-7ebfadf8f64e4f1db73b3133c395fc4a-systemd-logind.service-KL3CQX
systemd-private-7ebfadf8f64e4f1db73b3133c395fc4a-systemd-resolved.service-CLP4N8
systemd-private-7ebfadf8f64e4f1db73b3133c395fc4a-systemd-timesyncd.service-y5pTt9
zysgusg@aaa /tmp> mkdir missing
zysgusg@aaa /tmp> ls
fish.zysgusg
systemd-private-7ebfadf8f64e4f1db73b3133c395fc4a-systemd-logind.service-KL3CQX
systemd-private-7ebfadf8f64e4f1db73b3133c395fc4a-systemd-logind.service-KL3CQX
systemd-private-7ebfadf8f64e4f1db73b3133c395fc4a-systemd-resolved.service-KL3CQX
systemd-private-7ebfadf8f64e4f1db73b3133c395fc4a-systemd-resolved.service-KL3CQX
systemd-private-7ebfadf8f64e4f1db73b3133c395fc4a-systemd-timesyncd.service-KL3CQX
systemd-private-7ebfadf8f64e4f1db73b3133c395fc4a-s
```

图 2: 新建一个名为 missing 的文件夹

```
TOUCH(1)

NAME

touch - change file timestamps

SYNOPSIS

touch [OPTION]... FILE...

DESCRIPTION

Update the access and modification times of each FILE to the current time.

A FILE argument that does not exist is created empty, unless -c or -h is supplied.

A FILE argument string of - is handled specially and causes touch to change the times of the file associated with standard output.

Mandatory arguments to long options are mandatory for short options too.

-a change only the access time

-c, --no-create
do not create any files

-d, --date=SIRING
parse STRING and use it instead of current time

-f (ignored)

Manual page touch(1) line 1 (press h for help or q to quit)
```

图 3: 用 man 查看程序 touch 的使用手册

```
zysgusg@aaa /tmp> touch missing/semester
zysgusg@aaa /tmp> cd missing
zysgusg@aaa /t/missing> ls
semester
zysgusg@aaa /t/missing> _
```

图 4: 新建一个叫 semester 的文件

```
vim semester /tmp/miss × + v
#!/bin/sh
curl --head --silent https://missing.csail.mit.edu
~
~
~
```

图 5: 写入 semester 文件

```
zysgusg@aaa /t/missing> ./semester
fish: The file './semester' is not executable by this user
zysgusg@aaa /t/missing [126]> ls -l
total 4
-rw-r--r-- 1 zysgusg zysgusg 61 Sep 5 09:41 semester
```

图 6: 程序无法执行, 没有执行权限

```
zysgusg@aaa /t/missing> tldr chmod
change the access permissions of a file or directory.More information: https://www.gnu.org/software/coreutils/chmod.

- Give the [u]ser who owns a file the right to e[x]ecute it:
    chmod u*x {{path/to/file}}

- Give the [u]ser rights to [r]ead and [w]rite to a file/directory:
    chmod u*rw {{path/to/file}}

- Remove e[x]ecutable rights from the [g]roup:
    chmod g-x {{path/to/file}}

- Give [a]ll users rights to [r]ead and e[x]ecute:
    chmod a*rx {{path/to/file}}

- Give [a]thers (not in the file owner's group) the same rights as the [g]roup:
    chmod o= {{path/to/file}}

- Remove all rights from [o]thers:
    chmod o= {{path/to/file}}

- Change permissions recursively giving [g]roup and [o]thers the ability to [w]rite:
    chmod -R g+w,o+w {{path/to/directory}}

- Recursively give [a]tl users [r]ead permissions to files and e[X]ecute permissions to sub-directories within a directory:
    chmod -R a+xX {{path/to/directory}}
    versuses@aaa /t/mission>
```

图 7: 查看 chmod 的手册

```
zysgusg@aaa /t/missing> chmod a+rx <u>semester</u>
zysgusg@aaa /t/missing> ./semester
HTTP/2 200

图 11: 使用 ls 命令

```
zysgusg@aaa ~/1> marco
/home/zysgusg/1
zysgusg@aaa ~/1> cd <u>/sys/class/</u>
zysgusg@aaa /s/class> polo
zysgusg@aaa ~/1> _
```

图 12: marco.sh 效果

```
zysgusg@aaa:~$ source catch_error.sh
error at 1 times
output
Something went wrong
error
The error was using magic numbers
zysgusg@aaa:~$ source catch_error.sh
error at 7 times
output
Something went wrong
error
The error was using magic numbers
zysgusg@aaa:~$ source catch_error.sh
error at 136 times
output
Something went wrong
error
The error was using magic numbers
zysgusg@aaa:~$
```

图 13: 运行次数

```
zysgusg@aaa:/tmp/html$ find . -type f -name "*.html" -print0 | xargs -d '\0' zip html.zip
  adding: new_folder/2.html (stored 0%)
  adding: 1.html (stored 0%)
zysgusg@aaa:/tmp/html$ ls
1.html html.zip new_folder
```

图 14: 递归地查找文件夹中所有的 HTML 文件,并将它们压缩成 zip 文件

```
zysgusg@aaa:~$ my_ls 5
-rw-r--r- 1 zysgusg zysgusg 99 Sep 7 15:48 ./my_ls.sh
-rw-r--r- 1 zysgusg zysgusg 21 Sep 7 14:51 ./output.log
-rw-r--r- 1 zysgusg zysgusg 219 Sep 7 14:18 ./marco.sh
-rwxr-xr-x 1 zysgusg zysgusg 211 Sep 5 11:50 ./error.sh
-rw----- 1 zysgusg zysgusg 20 Sep 5 10:36 ./.lesshst
xargs: ls: terminated by signal 13
```

图 15: 按照最近的修改时间列出文件

```
This concludes the Vim Tutor. It was intended to give a brief overview of the Vim editor, just enough to allow you to use the editor fairly easily. It is far from complete as Vim has many many more commands. Read the user manual next: ":help user-manual".

For further reading and studying, this book is recommended:

Vim - Vi Improved - by Steve Oualline

Publisher: New Riders

The first book completely dedicated to Vim. Especially useful for beginners. There are many examples and pictures.

See http://iccf-holland.org/click5.html

This book is older and more about Vi than Vim, but also recommended:

Learning the Vi Editor - by Linda Lamb

Publisher: O'Reilly & Associates Inc.

It is a good book to get to know almost anything you want to do with Vi. The sixth edition also includes information on Vim.

This tutorial was written by Michael C. Pierce and Robert K. Ware,
Colorado School of Mines using ideas supplied by Charles Smith,
Colorado State University. E-mail: bware@mines.colorado.edu.

Modified for Vim by Bram Moolenaar.
```

图 16: 完成 vimtutor

```
zysgusg@aaa:~$ mv vimrc ~/.vimrc zysgusg@aaa:~$ vim ~/.vimrc
```

图 17: 完成 vimrc 设置

```
zysgusg@aaa:~$ mkdir -p ~/.vim/pack/vendor/start
zysgusg@aaa:~$ cd ~/.vim/pack/vendor/start
zysgusg@aaa:~/.vim/pack/vendor/start$ git clone https://github.com/ctrlpvim/ctrlp
.vim

3 心得体会 10

## 3 心得体会

• 通过本次实验, 我学到了 shell 命令和 vim 相关的知识, 加深了对 shell 脚本实现机制的理解。
